

Stratus

A

NEW

BEGINNING.

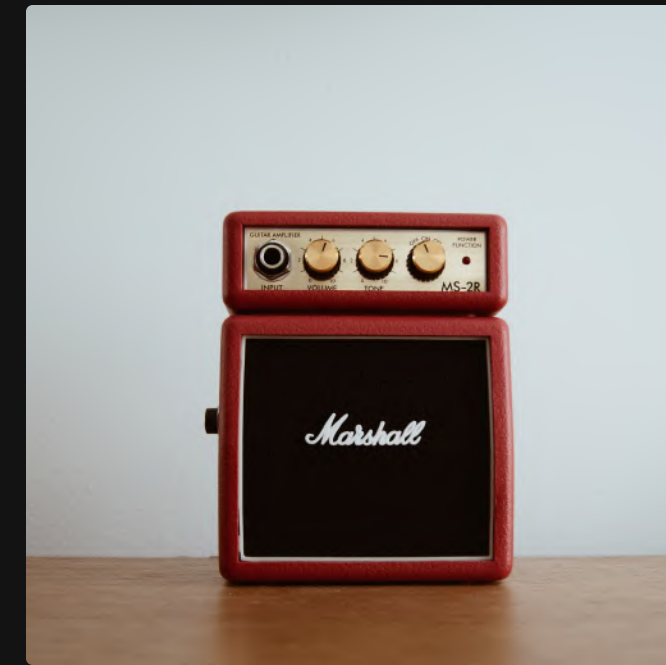

Our idea.

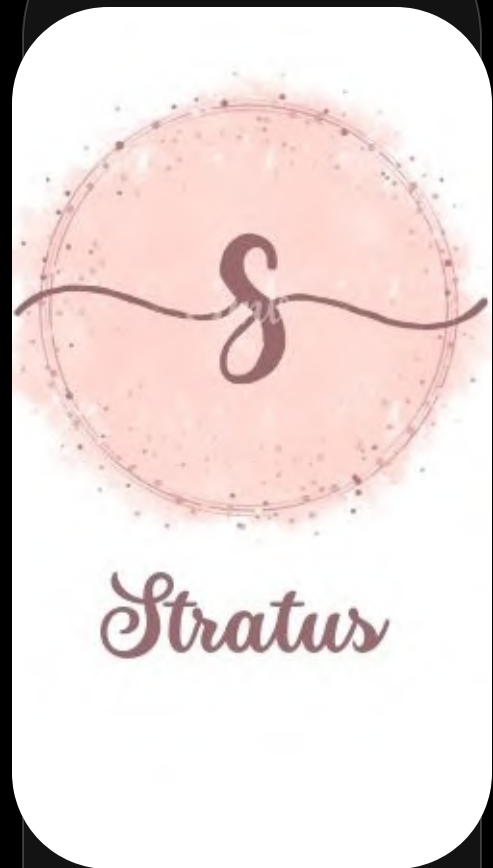

Our company goals are to bring people with the same music taste closer and to encourage them to listen different genres and support the creators.

The future in music IS HERE

Our new app will change the whole music industry.

What is STRATUS?

Stratus is a different social media app that brings people around the world to listen and communicate together.

Our app will include online concerts, the "meaning" of songs and more. This will help people understand the song and the artist.

Every artist will have a feedback and a question section where people can ask and rate them.

Every genre will have chat rooms where people will be able to talk and listen to music at the same time. Anyone will be able to join different music groups and experience other genres.

Spend your time carefully

18.4

An average person listens to 18.4 hours of music per week.

Studies show that it's better to listen music with your friends.

We have partened
with SPOTIFY.

We have reached the
confirmation that we
will collaborate with
spotify for artist to
receive the copyright
of their songs.

“Our app will be always free. We will make money from ads and the “pro” version.”

Pirlea Eoden, CEO

Stratus PRO:

PRO

Unlimited music groups
No ads
Unlimited friends
Own music group

\$5

Our app will need around
100.000\$ to start.
